Project

Tourism Website   project1_link

Technologies used : HTML, CSS, Bootstrap

Devised an immersive web experience for users to discover top travel destinations through images, videos, and descriptions.

- Developed a mobile-optimized interface using HTML elements and CSS3 styling techniques, including background, flex, and CSS box model properties.
- Implemented destination galleries and virtual tour videos utilizing Bootstrap carousel and embed components.

Food Munch   project2_link

Technologies used : HTML, CSS, Bootstrap

Discover the world of food with this responsive website that showcases a comprehensive list of food items.

- Designed with a user-centric approach, this website features HTML structure elements and Bootstrap components to ensure a seamless experience.
- Get a closer look at the food items with product videos, available at the click of a button.

Wikipedia Search Application

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

Experience a new level of information access with a custom wikipedia search application that simplifies the search process. With a user-friendly interface and relevant results, users can expand their knowledge in no time.

- Intuitive search results with HTML list elements, styled with CSS, Bootstrap, and responsive design for a seamless user experience.
- Effortlessly access desired information with asynchronous fetch GET HTTP API calls and the option to open results in a new tab for further exploration.

login page

Technologies used : HTML, CSS

this login page has glow borders when the input box was clicked the out line will glow even the button will also glow

april code challenge
i have completed my web technology with a consistency

Certificates
